# Hazardous Weather

# Hazardous Weather

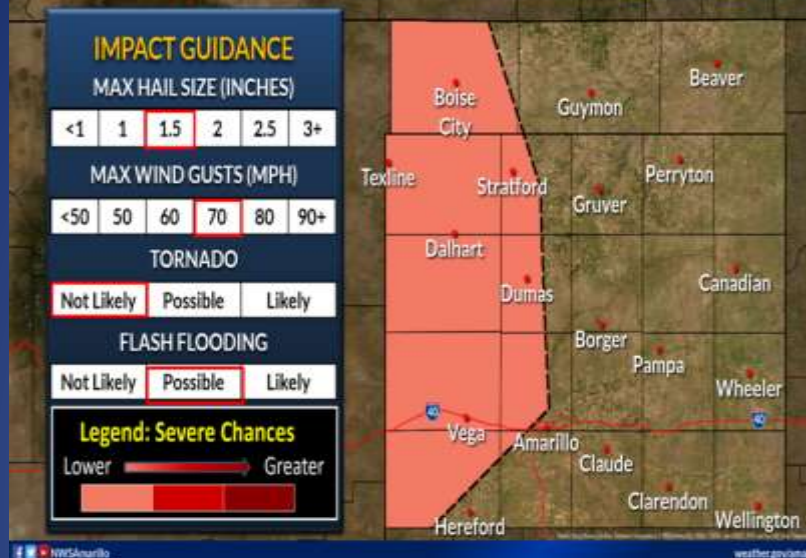

## Severe Thunderstorm Potential - 7 pm to 11 pm

Storm Motion Southeast 20 mph

Weather Forecast Office

Amarillo, TX

Issued Jun 13, 2021 4:59 AM CDT

Strong to severe storms will once again be possible this evening. Coverage may not be as widespread as it was on Saturday, and in fact it may only be isolated in nature. Strong winds and large hail will be the main concerns with any storms that manage to form.

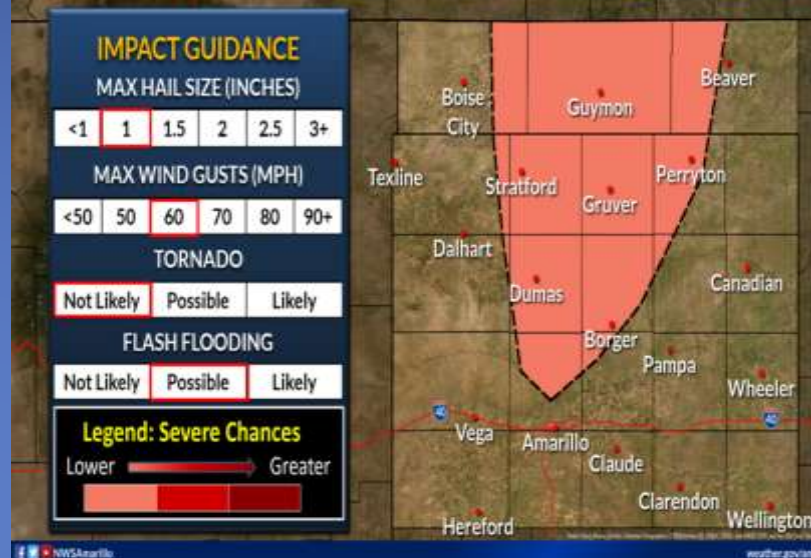

## Severe Thunderstorm Potential - 11 pm to 3 am

Storm Motion Southeast 20 mph

Weather Forecast Office

Amarillo, TX

Issued Jun 13, 2021 4:59 AM CDT

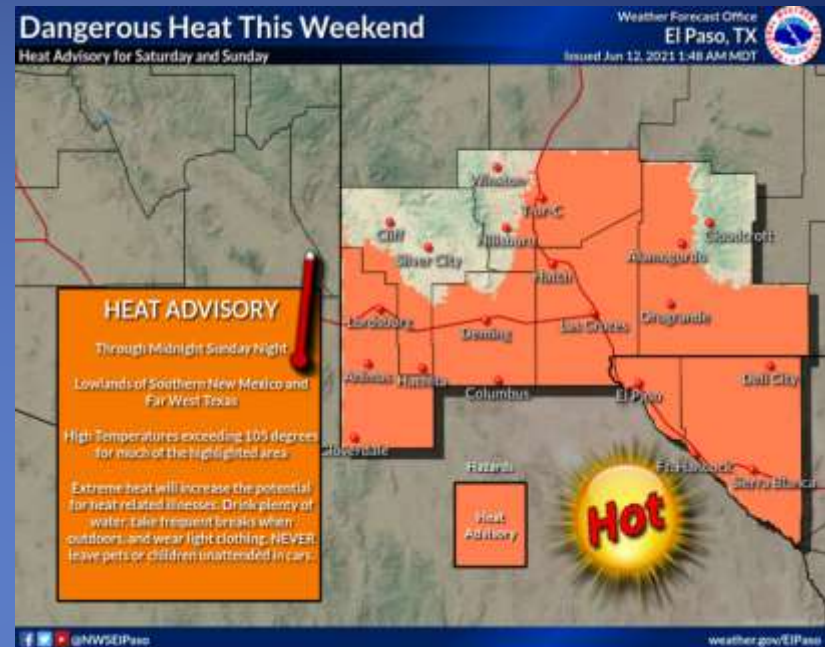

Storms may continue to linger overnight in the central Panhandles with 60 mph winds and hail up to the size of quarters possible.

# Hazardous Weather

Heat and humidity will persist along with a risk for isolated showers and thunderstorms, especially west of the I-35 corridor this afternoon and into tonight. Widespread severe weather does not appear likely, though some storms may produce strong outflow winds if they occur. Highs will climb into the 90s with heat index values up to near 103 degrees.

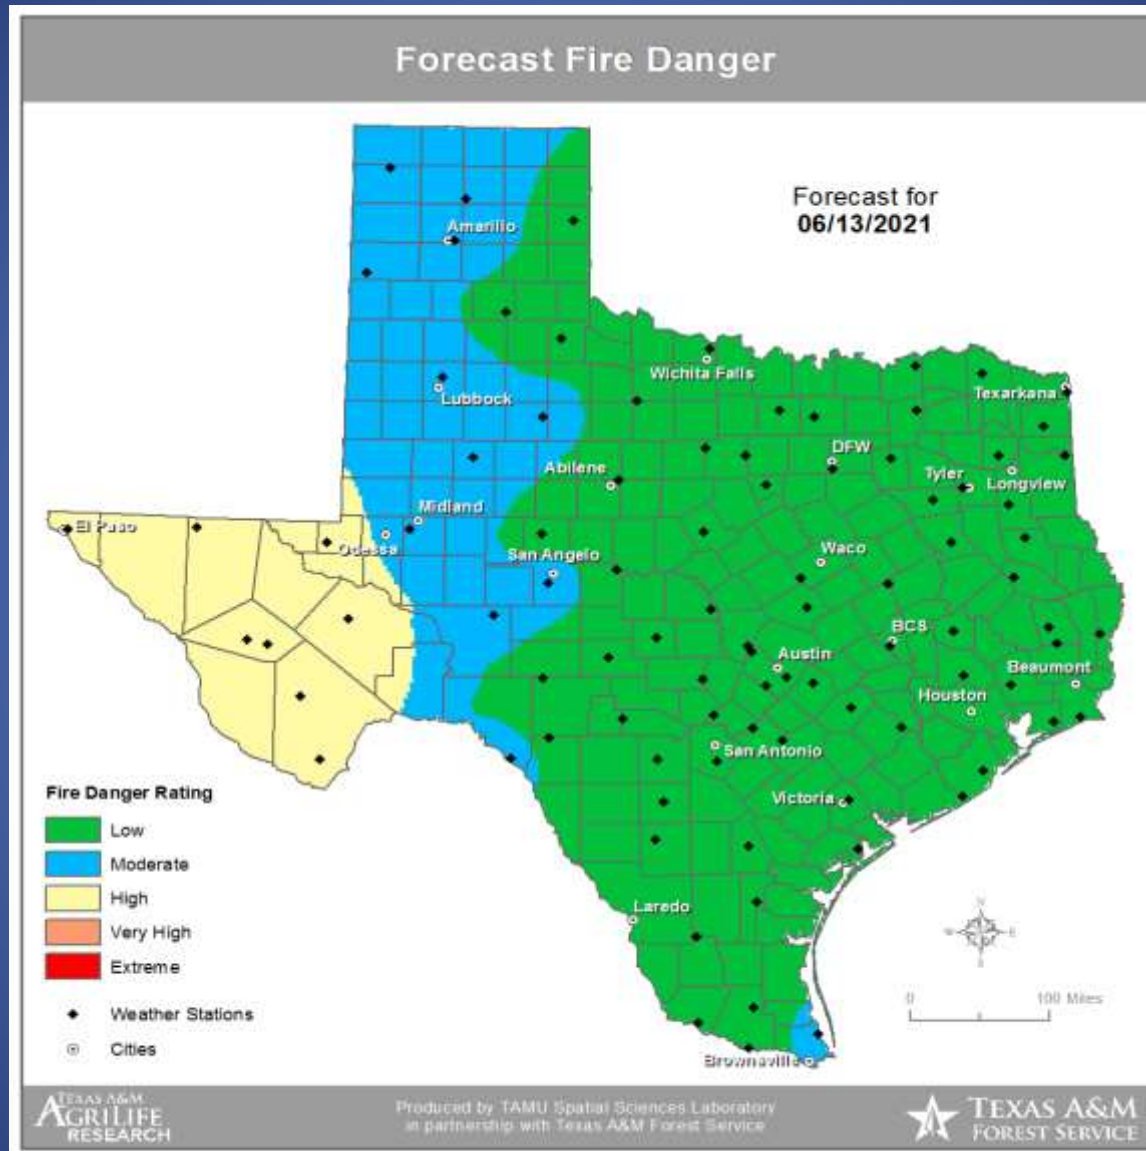

A Heat Advisory is in effect for most of far west Texas and portions of south-central New Mexico including Las Cruces, Deming, and Alamogordo. High temperatures on Saturday and Sunday will range from 104 to 107 degrees. This will produce dangerous heat conditions and increase the risk for heat related illnesses. People should schedule outdoor activities to the morning or late evening hours. If you have to be outside be sure to drink plenty of water and take numerous breaks.

# Weather Warnings/Advisories Issued

| DATE     | WARNING TYPE                | LOCATION   |
